### Our Strength

First we propose the production method, then fix the production process together with the customer.

Superior processing technology

- 1) JR Maglev superconducting magnet cooling equipment
- 2) Humanoid robot exhibited at Aichi Expo 2005
- 3) Special bolts

Flexible customer service

Meeting the needs of customers, such as lot production, rapid delivery, low price.

### Needs we can correspond / Business partners we want

We manufacture mainly prototype parts for automotive, other mass production parts and precision machinery parts. We supply products to customers with high quality and short delivery time. We also actively approach other than the automobile industry to become a manufacturer "Akevono Industrial", we continue to pursue technology improvement.
