## Business Overview

Centered on the development technology of communication equipments cultivated by WANTS' predecessor, the Oki Electric Industry Co.. We specialize in developing electronic circuits and systems that meet the customer needs by providing a variety of tests equipment and functional modules.

## Products • Materials • Part Sizes • Facilities & Equipment

<Development achievements>

- Aircraft control actuator unit (prototype)
- Wire harness checker jig
- Communication control board for ATC(Air traffic control).
- FPGA for propulsion control of rocket engine

<Facility>

General-purpose measuring instruments (Oscilloscope etc.), CAD(OrCAD, ME-10), FPGA development tools

## Our Strength

We are a group of engineers who specialize in the diversity development of electronic circuit design, FPGA design and software design. In order to maintain the design quality, we carry out the development process according to the in-house quality control system

## Needs we can correspond / Business partners we want

We support the following contract types according to customer's request

- Contract

Depending on the conditions, we can also work at the customer's site.

## Office & Plants
